

ENTERPRISE MULTI-CLOUD. AUTOMATED. SIMPLIFIED.

AppZ from Cloud Control is a cloud management platform to provide end-to-end automation from source to live, using GitOps, Approval Workflow, Controls and Day 2 Observability. AppZ platform consists of proven software, framework and methodology to accelerate **Digital Transformation** and **Cloud Migration**.

SOLUTION ARCHITECTURE/HOW IT WORKS

AppZ framework offers a true **GitOps** model, where development details are traceable to Source Control Systems (i.e. GitHub) to obtain the complete audit artifacts such as user information, changes reasons and timestamps. AppZ platform enforces separation of duties among Application Developers, DevOps and Infrastructure Admins. Due to this enforcement, build and certification of OS and Middleware components are separated from the application development process. This eliminates numerous risks of all kinds such as unverified open source, stability, malware etc., from the overall application deployment process.

Cloud Control provides AppZ, a software solution to accelerate cloud migration to Private, Public or Hybrid Cloud. Cloud Control provides pre-fabricated cloud adoption templates, known as AppZ Stacks, that are proven, secure and ready to use with guardrails. Clients can use these Stacks right out of the box or layer their business application on top of them, to accelerate the deployment process in their choice of selected cloud: Nutanix, AWS, Azure, GCP or multi-cloud. Clients can

achieve savings of 50-70% in cloud migration costs using their existing talent/staff by utilizing AppZ platform.

KEY SOLUTION BENEFITS

Cloud Control delivers end-to-end solutions for Private or Public Cloud migration. Main benefits of the solution are:

- Increase Agility
 - Prefabricated Adoption Templates
 - Adoption Tools
 - One-click Deployments with GitOps
- Reduce Risk
 - Code Driven, Infra-as-code
 - Secure Image Source, Scans
 - Governance and Workflows
- Reduce Cost
 - 100% Automation, Self Service
 - Low Total Cost of Ownership
 - Auto Scaling, Self-Healing

ABOUT CLOUD CONTROL

CLOUD CONTROL SOLUTIONS (CCS), based out of Boston MA, USA was founded in 2019 by a group of accomplished and experienced FinTech executives in the industry. AppZ from CCS provides a fully automated enterprise digital and cloud migration solution.
